Awareness training

Bespoke training provided to your employees to drive up recycling rates, improve your sustainability performance and help lower your waste bills.

Your partner in sustainability

We help our clients meet their environmental ambitions, secure green certification status and save money through recycling

Averda supports our clients to become truly sustainable businesses, meaning your 'waste' is reduced, reused and recycled, with as little as possible left to landfill.

We work with each of our clients to identify where they can improve their sustainability performance, ensuring that they meet the accreditation requirements for those all-important green certifications.

We provide a range of bins for waste segregation and all the training and support your employees need to use them.

Clean the World®

Supporting sustainability

Rebates

We calculate the money saved by recycling your waste and provide rebates to your business, lowering your operating costs.

Reporting

We provide regular, accurate reports and analyses about your waste streams – reinforcing 'good' behaviours, identifying opportunities to increase sustainability and assisting with your corporate sustainability reporting.

Service with style

We know that in hospitality, looks matter. Hygiene and cleanliness are paramount and poor standards and sloppy execution not only increase operating costs but can damage business reputations.

That's why we ensure that our bins, trucks and personnel are always neatly presented and our operations are well executed.

HOTEL
LOGO  AVERDA

Waste Segregation

Before segregating waste be sure to know which bin to use and Averda will take care of the rest.

All our education and marketing materials are adaptable to suit your brand. Our messaging and clear bin signage is proven to nudge employees and guests to change their usual actions and improve recycling and waste reduction behaviour.
