

PARTNERING IN CARE

OUR HEALTHCARE WASTE
SOLUTIONS

OUR
PRESENCE
IN THE
REGION

We are proud to provide a cost-effective, end-to-end healthcare waste management solution for our clients across the region.

For over 35 years, we have provided high-quality, efficient waste management services to satisfied clients, prioritising safety and reliability. Operating over three continents, Averda has developed the expertise, systems and processes to handle medical and healthcare waste for businesses both large and small.

We work with you to determine the exact service to fit your needs. From providing the bins and staff training to ensuring regulatory adherence and reporting, we will take the worry out of dealing with medical waste. Whether you have just a small clinic or operate a major hospital chain, we can provide a tailored waste management service just right for you including collection schedules that suit your routine.

Why not try us, and see for yourself why so many healthcare businesses around the world choose Averda to deal with their waste needs.

What we do

Averda Healthcare Waste Solutions is uniquely positioned to offer you the most comprehensive healthcare waste disposal systems – we are a partner you can rely on and an expert that you can trust.

From the supply of specific containers, collection to disposal, every single aspect of the journey is managed through us – be it logistics, transportation, safety, compliance, documentation or staff training, we're here to make the process simple and seamless.

REGULATORY COMPLIANCE

The management and disposal of healthcare waste is quite rightly a highly regulated activity. We hold all the correct licences and permits to enable us to collect, transport and dispose of healthcare waste. We are proud to maintain

100% regulatory compliance ourselves, and our experts can advise and support your business in adhering to relevant legislation.

EXTENSIVE LOGISTICAL NETWORK

Whether you are running a national pharmaceutical corporation or a rural clinic, we're strategically located in all major centres and have an infrastructural network that spans the entire region, ensuring we can service any facility.

TRACKING AND CONTROL

Through our powerful real-time, digital tracking system, business owners are able to improve security, staff productivity, associated business processes and customer care. All waste output is recorded, itemised, weighed, scanned and verified. We are relentlessly thorough in the documentation and management of every single stage of the process.

We use GPS technology to track your waste en route to guarantee complete compliance. An automated dynamic vehicle routing system is used to ensure prompt and efficient delivery, while maximising fuel efficiency. At the end point, all waste is checked against the supporting documents.

Value-for-money

We know you're looking for the best price, and our services provide excellent value. Our years of experience allows us to recommend ways for you to reduce your medical waste streams and reduce your bills, and we can provide the appropriate bins and staff training to support waste segregation and minimisation.

QUALITY PRODUCTS TO SUIT YOU

We have developed a range of secure, simple-to-use and convenient waste receptacles developed with the needs of busy healthcare professionals in mind. They also ensure your healthcare waste is safely contained, easy to transport and easy to identify.

Our waste containers are tough, stackable and are designed to hold the maximum volume whilst minimising floor space. All our lids are secure, with safety and ease of use in mind.

Our sharps receptacles are equipped with a special sliding lid mechanism and a locking ratchet to avoid needlestick injuries. Our different size bins have an interchangeable wall/trolley bracket which allows you to flex your capacity according to how busy you are and contributes to cost-saving initiatives.

Our expert team will supply the containers specific to your facility's requirements, and will provide the necessary signage and training to ensure they are used properly.

Your partner in safety

Our healthcare waste teams are highly trained and take all safety precautions including full PPE when collecting and transporting your healthcare waste. In 2020 we introduced an additional fogging of buildings and vehicles service to help curb the spread of Covid-19.

Taking care of every step

WASTE CREATION

Every day, healthcare facilities create volumes of waste that must be disposed of **safely and effectively**.

HAZARDOUS

GENERAL
NON-HAZARDOUS

GENERATION AND ACCUMULATION

We train hospital personnel in best practice methods to correctly **segregate and containerise** waste.

TYPES OF WASTE:

-  **PATHOLOGICAL**
-  **INFECTIOUS**
-  **SHARPS**
-  **PHARMACEUTICAL/
CHEMICAL WASTE**

COLLECTION

We liaise with each facility and establish delivery times and specified collection locations. We schedule regular meetings with healthcare staff and therefore have a history of excellent on-site waste management operations.

ITEMISATION

We use specific **Compliance Software** which enhances the **Integrated Management System's** documentation capability.

Our **Legal Register** ensures compliance with all legislation.

We utilise dynamic service routing software to compile efficient and effective fixed and dynamic route structures to deliver consistent and on time service to your facility.

HANDLING AND TRANSPORTATION

Our specifically-modified vehicles are tracked and monitored at all times to ensure that we always know where your bins are, every step of the way.

TREATMENT AND DISPOSAL

Everything is treated in accordance with current regulations and the legislation of the province or area we operate in.

PEACE OF MIND FOR OUR CUSTOMERS

And access to electronically archived compliance records.

OUR MANAGED LANDFILLS

GENERAL WASTE

DISPOSAL FACILITY

Accepts and handles high hazardous waste and general and hazardous materials. Full waste classification process takes place here.
